

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

## Corrections.

- Vol. I. Page 1, line 4. *For Fyffhc read Fysse.*  
 ———, line 6. *For Chappina read Chappmā.*  
 ——— Page 3, last line. *For Ernot read Emot.*  
 ——— Page 7. The two marriages entered in Latin appear, according to an almost illegible marginal note, to have taken place in February, 1577.  
 ——— Page 152. The marriages of S. Breedon and E. Crofts and of J. Allot and A. Bryan took place on the 10th and 14th of October, 1721.

The above are the only errors we have detected in the abstract comprised in these two volumes. Several *apparent* errors occur, but in every instance they have been compared with the original entries, and found to be correct.

- Vol. I. Page 251. The accuracy of the abstract " Benjamin Darkley & Elizabeth Walkden 19 June 1761 " having been questioned by Dr. R. C. Chicken, of Nottingham, the Editors have caused the entry to be copied in full. It is as follows :—

" Benjamin Darkley and Elizabeth Walkden both of this Parish were married in this Church by Banns this nineteenth Day of June in the year one thousand seven hundred and sixty one by me Francis Simes Minister This marriage was solemnized between us Benjman Darkley Elizabeth Walkden In the Presence of Ann Walkden her X mark Wm. White."

In a letter to one of the editors Dr. Chicken refers to the spelling of registrars as being " notoriously loose," and that no one accustomed to old manuscripts would ever assume the names to be more than phonetically or even approximately correct. The register in which this entry occurs is entirely in manuscript (not printed forms filled in), the entries, with the exception of the *signatures* of the contracting parties and witnesses, being written by the officiating clergyman. The Rev. Francis Simes, who made this particular entry, was afterwards Vicar of Ruddington and Curate of Plumtre, Notts., and died 17 December, 1798, aged 68. There is a small tablet to his memory in the north aisle of Plumtre Church. The entry, it will be seen, is spelt by Mr. Simes as Darkley, which agrees with the spelling of the signature, but Dr. Chicken says that Benjamin Darkley's name (though so *signed* in the register) was really *Darker*. Dr. Chicken states that a Benjamin Darker was the son of William Darker (who died intestate in Leicester-shire), came to Nottingham about 1750, and was his great-grandfather. Wylie, *Old and New Nottingham*, 1853, page 367, says: " Towards the close of 1796, Benjamin Darker, an industrious needle-maker of Nottingham, built the first house of what is called New Radford, and which is now connected with Nottingham." There are numerous *Darker* entries in the registers of St. Mary's, Nottingham.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million.

There are a number of reasons for this increase. One of the main reasons is that the world's population has grown by 1.5 billion in the last 20 years, and the demand for food has increased accordingly.

Another reason is that the world's population is becoming more urbanized, and this has led to a decline in the number of people working in agriculture.

A third reason is that the world's population is becoming more aged, and this has led to a decline in the number of people working in agriculture.

There are a number of ways in which we can address the problem of undernourishment. One way is to increase the production of food.

Another way is to improve the distribution of food. A third way is to improve the nutrition of the population.

There are a number of ways in which we can improve the production of food. One way is to increase the use of fertilizers.

Another way is to improve the irrigation system. A third way is to improve the seed selection.

There are a number of ways in which we can improve the distribution of food. One way is to improve the transport system.

Another way is to improve the storage system. A third way is to improve the marketing system.

There are a number of ways in which we can improve the nutrition of the population. One way is to improve the diet.

Another way is to improve the health care system. A third way is to improve the education system.
